Since 1936

The Aalto vase dates back to 1936 and was first presented at the Paris World Fair the following year. Its fluid, organic form is still mouth blown today at the Iittala factory. It takes a team of seven skilled craftsmen working as one to create one Aalto vase – an icon of modern design.

**Birds by Toikka**  
Oiva Toikka 1972

Oiva Toikka (1931-2019) is one of the greatest names in Finnish design. Oiva Toikka's iconic Birds by Toikka collection first took flight in 1972. The collection embodies a rich fusion of traditions and would not be possible without Toikka's hands-on approach at the glassworks and his understanding of each glassblower's skills. With inspiration from nature and his passion for art glass, Toikka created more than 500 birds during the last four decades.

These little creatures are mouthblown which makes them unique treasures in homes, offices, or any other place where they nest.

Timo Sarpaneva 1983

Every Claritas piece is a unique work of art. Air bubbles, layers of coloured glass and shapes are taken to their extremes, demanding deep knowledge of the material from the blowing to polishing and every step in between. With all the unattainable colours that Sarpaneva could only dream of in the 1980s, Claritas objects are now glowing in different shades alongside the originals from the 80's.

**Festivo**  
Timo Sarpaneva 1966

Timo Sarpaneva originally designed the Festivo candle holder as a wine glass for himself. His goal was to be able to fit an entire bottle of wine into a single glass. The result was a rough surfaced, ice-like glass with the bowl and base parts blown separately. One day when noticing the base parts sitting on their own in the factory, Sarpaneva was inspired to turn them into candle holders and so the prototype of a new classic was born.

Available in Finland and Sweden.

**Nappula  
Matti Klenell 2012**

Beloved Nappula (Finnish for 'button') collection is perhaps designer Matti Klenell's most recognizable design. Inspired by the odd, large feet of an old table at the Nuutajärvi Glass Museum, Klenell first incorporated the soft, round shape into a wide array of candle holders. Now, Klenell has expanded into plant pots that showcase the same distinct Nordic design. Nappula pots have a flowing curved shape and a strong stem that is perfect for creating inspiring plant displays.

**100 % recycled glass  
2019**

In 2019 Iittala introduced a new collection of design icons made solely of 100 % recycled glass from the Iittala Glass Factory. Iittala Glass Factory was one of the world's first industrial manufacturers to create tumblers solely from recycled glass.

Created with extra thoughtfulness for the planet. Mixed coloured glass results in a beautiful variation of blues, greens and natural earthy shades. Each recycled glass object is unique, which means some might have minor visual imperfections like small bubbles that were generated in the recycling process. Recycled glass items are as durable, clear and high quality as objects made of virgin material. Recycled collection items allow us small, beautiful ways of creating a more sustainable future together.

Available in global Iittala stores and web shop.

**Kastehelmi**  
Oiva Toikka 1964

The Finnish name 'dewdrop' refers to the circles of bubbles on the pressed glass. Inspired by Finnish nature, the dewdrops glisten like a string of pearls on grass in the morning sun. Oiva Toikka's love for experimentation led to the creation of an entirely new droplet design for Kastehelmi. The resulting surface structure brings out the living, reflective beauty of the glass.
